
+ Matthieu Dufour / *Curriculum Vitae 2011*

Profile

I devote myself to design for **function/concept rather than looks.**

This systematic vision allows me to find creative solutions empowered by a strong technical background and digital culture.

I specialise in motion and web graphics, as these two heavily computerised areas offer me a lot of flexibility and creative freedom, but I am a typography lover and often find myself playing with more traditional kinds of media.

Skills

Design & Execution

My range of skills spread from art direction to technical tasks, which offers me a fair amount of autonomy, but I feel comfortable working in a team environment.

That versatility allowed my employers to be confident about both aspects of their projects.

Project direction

My professional experience gave me the chance to direct projects as an art director and therefore as a team leader.

I am able to rely on my organisational and social skills to ensure the proper realisation of the projects I am in charge of.

Technical

Software

- + Photoshop CS5
- + Illustrator CS5
- + Flash CS5
- + InDesign CS5

- + After Effects CS5
- + 3ds Max 2011
- + Vray 2011
