

## + Matthieu Dufour

Portfolio [www.matthieudufour.com](http://www.matthieudufour.com)

### Profile

“ I devote myself to helping brands find their visual language ”

This systematic approach allows me to find creative solutions empowered by a robust technical background and digital culture.

Moreover, having lived and worked in the UK for several years, my proficiency in english is a major asset for handling international clients.

### Skills

#### Conceptualize & design »

My versatility in all things graphics stems from a vast range of skills from visual identity, layout, typography to UI, motion design, FX, grading, modeling and product rendering and provide me with a comprehensive vision that helps me meet the needs of my clients.

#### Project direction »

I had the chance to direct projects as an art director and therefore as a team leader. As such, I am able to rely on my organisational and relational skills to ensure the success of the projects I find myself in charge of, while making the most of my partner's talents.
